EDUCATION

Imperial College London

MEng Biomedical Engineering

Year 1 Classification: First-Class Honours

Modules: Bioengineering Science; Computer Fundamentals and Programming; Mathematics; Mechanics and Electronics; Medical Science; Design and Professional Practice

London, UK

2025 – 2029

National Presidential Science Scholarship

Merit-based scholarship awarded to ~20 students nationwide (\$200K)

President of South Korea

2025 – 2029

North London Collegiate School Jeju

IB Final Grade: 45/45, Biology Scholarship Award (Valedictorian)

Jeju, KR

2012 – 2025

EXPERIENCE & LEADERSHIP

Publicity Lead, ONLJ Alumni Committee

Sep. 2026 – Present

- Develop and iterate the ONLJ alumni website using **Claude Code**, gathering requirements through stakeholder conversations and translating user needs into practical web features.

Operations Manager, Lab45 — Education Startup

Jun. 2026 – Present

- Manage cross-functional team operations, streamline meeting agendas and decision-making, and coordinate initiatives across team management, outreach, and marketing.

TECHNICAL PROJECTS AND RESEARCH

Medical Device Prototyping Collaboration – Entia x Imperial ProtoSoc

Jan. 2026 – Mar. 2026

Imperial College London

London, UK

- Collaborated with Entia over 10 weeks through Imperial ProtoSoc to engineer a non-biological quality-control sample for patient-use device calibration.
- Designed and iterated optical standards using 3D printing, fluorescent beads, resin matrices, and nano-LED strips to emulate blood-like optical responses and improve calibration repeatability.

Imperial Prosthetics Society, Exoskeleton Team

2025 – Present

Imperial College London

London, UK

- Prototyping a pneumatically actuated exoskeleton for upper-limb assistance.
- Lead team communication and technical documentation supporting design coordination and project continuity.

Bio-inspired Robotics: Machine Learning, Design and Control

2023

Cambridge Centre for International Research Future Scholar Programme

Online

- Conducted research under Dr. Thomas Thuruthel on machine learning, design, and control for bio-inspired robotic systems.
- Selected as the programme's sole candidate for the Student Research Spotlight Interview.

Vinyl-based McKibben Actuators Research for Soft Exoskeletons

2023 – 2024

Independent

Jeju, KR

- Developed and experimentally tested vinyl-based McKibben actuators for upper-limb assistive applications.
- Research recognised with Gold at KSEF International (2024) and Bronze at KSEF (2023).

Principal Researcher & Team Leader, Squat Insurance Project

2022 – 2023

NLCS Jeju

Jeju, KR

- Modelled squat safety regions mathematically and used TensorFlow and Google Teachable Machine to guide safer movement.
- Presented at the World Mathematics Competition, March 2023.

SKILLS

Technical: Python; TensorFlow; Google Teachable Machine; Harness Engineering; Agentic AI; Claude Code; 3D Printing; Rapid Prototyping; Technical Documentation

AWARDS & DISTINCTIONS

- Microsoft Technology Associate – Introduction to Programming using Python (2023)
- 1st Place (Regional)**, Data Utilization Ideas for AI Learning in the Medical Field – *Chungbuk Governor's Award* (2022)
- Overall 4th & Maker Award (International)**, Intelligent Ironman Creativity Contest – South Korean Representative (2023)
- Gold Medal (International)**, KSEF International (2024)
- Silver Medal (International)**, KSEF International (2023)
- Silver Medal (International)**, British Biology Olympiad (2023)
